

**Attachment B**  
**Cleaned-Up Version of Amended Claims (as of 11/21/2002)**

IN THE CLAIMS:

Sub C1  
Q1  
1. (Amended). A method for disseminating real time information comprising the steps of:  
receiving the information from a provider of the information by a quote server;  
determining if the information is being requested by a user;  
sending the requested information to a contact server; and  
distributing the information to the user from the contact server.

Q2 C1  
3. (Amended) The method of claim 1 wherein the information is stock quotes.

Sub C2  
Q3 C2  
7. (Added) The method as defined in Claim 3, wherein:  
the step of determining if the information is being requested by a user is accomplished by  
the quote server determining if the contact server is requesting a particular stock quote; and  
the step of sending the requested information to the contact server is accomplished by the  
quote server sending the requested information to the contact server.

8. (Added). The method as defined in Claim 7, wherein the contact server is a workstation.

9. (Added) The method as defined in Claim 7, wherein a database is associated with the quote  
server, and the method further comprises tracking the history of each particular stock quote using  
the database.

10. (Added) The method as defined in Claim 9, further comprising:  
receiving the particular stock quote;  
determining if the particular stock quote is in the database;  
adding the particular stock quote to the database if the particular stock quote is not in the  
database; and  
updating the database if the particular stock quote is already in the database.

11. (Added) The system as defined in Claim 5, wherein the information is stock quotes.

12. (Added) The system as defined in Claim 11, further comprising a database associated with the quote server and positioned to track the history of each particular stock quote, and wherein the quote server further determines if the particular stock quote is in the database, adds the particular stock quote to the database if the particular stock quote is not in the database, and updates the database if the particular stock quote is already in the database.

13. (Added) A system for disseminating real time information comprising:

- a quote server positioned to receive stock quote information from a provider;
- a contact server, positioned to request a stock quote from the quote server, responsive to the stock quote request being requested by a user;
- means associated with the quote server and responsive to the stock quote request for sending a stock quote to the contact server; and
- means associated with the contact server for disseminating the stock quote received from the quote server to at least one user.

14. (Added) The system as defined in Claim 13, wherein the provider is a field vender.

15. (Added) The system as defined in Claim 13, wherein the contact server is a workstation.

16. (Added) The system as defined in Claim 13, further comprising a database associated with the quote server and positioned to track the history of each particular stock quote, and wherein the quote server further determines if the particular stock quote is in the database, adds the particular stock quote to the database if the particular stock quote is not in the database, and updates the database if the particular stock quote is already in the database.
